

NEWS OF THE WORLD TOLD BY THE SUN'S CORRESPONDENTS

PARIS POLICE CATCH KING OF 'HOTEL RATS'

Man Who Robbed Visitors at Fashionable Resorts Taken After 22 Years.

LIVED A DOUBLE LIFE

Wife and Five Children Believed He Was a Jewelry Salesman.

Special Correspondence to The Sun.
Paris, Oct. 24.—A white-haired old man with a bushy white beard entered a hotel in the Rue de la Paix, Paris, last night. He was dressed in a dark suit and a white shirt with a high collar. He made the usual inquiring remarks, and after a few minutes he was shown to his room. "See that I am called at 10 o'clock," he said. "I have some early business," were his parting words to the clerk.

About 10 o'clock in the morning the police officers, who had been informed by the hotel manager that a man had been seen in the room, entered the room. They found the man sitting on the bed, looking at a small clock. The police officers entered the room and found the man sitting on the bed, looking at a small clock. The police officers entered the room and found the man sitting on the bed, looking at a small clock.

Father of Five Children.

Thouast, 52 years of age, has been married since 1895. He is the father of five children, the oldest of whom is 17 years of age. Living as a bourgeois in a little villa at Boulogne, near Paris, he spent most of his time away from home in the guise of a drifter.

He visited particularly the famous watering places, patronized by the wealthy, the Riviera, well known hotels in Switzerland and in Paris. In this way he was able to earn from \$500 to \$1,000 a month. He knew his way well in the respectable looking man who was seen sitting in the corner of the hotel had almost no resemblance to the man who entered your room while you slept and got away with your valuables.

Wife Became Suspicious.

Louise, the smallest of the Thouast children, learned of her father's secret from a comrade. She was in the street in front of her home when a little girl called to her. "Louise," she said, "your father is a thief. He has been hiding things in the house, and he has been taking them away from you."

HUGO STATUE FOR GUERNSEY.

Memorial to Be Presented by the French Government.

Paris, Oct. 24.—President Poincaré will move in next June a statue of Victor Hugo presented by the French Government to the island of Guernsey, where the great French writer spent fourteen years of his life.

Drew Spark From His Finger.

About the same time I put an are light into the court of the Park Avenue Hotel, New York city. The framework of the building was of steel, the counterweights of the elevators were of steel, and the building was bolted to the framework of the building.

WALKING AS A PUNISHMENT.

French Professor Uses Novel Means of Subduing Bad Pupils.

PARIS, Oct. 23.—Prof. Roland has just devised an ingenious method of punishing pupils who are idle, indolent, or who remain in to write lines, or do similar tasks, he makes them walk five miles. They are required to produce from their parents a certificate that the walk has been made.

COCAINE SOLD IN VIOLETS.

New Scheme to Market Drug Discovered in Paris.

PARIS, Oct. 23.—A new method for the illicit sale of drugs has been discovered to meet the ever growing demand of Montmartre.

WINANS BAGS 2,000 LB. AUROCH.

Record Specimen Shot by American in Prussian Poland.

LONDON, Oct. 23.—A record specimen of the aurochs, the nearly extinct European bison, has been shot at Talsen, Prussian Poland, by Walter Winans.

CAMBRIDGE TO HAVE BATHS.

Other English Colleges Also Making Provisions for Cleanliness.

LONDON, Oct. 24.—Provision for cleanliness in the shape of bathrooms is a striking feature of the new buildings which have been erected at various Cambridge colleges in readiness for the new term.

STOLEN WORK OF ART QUICKLY RECOVERED.

Theft of Pinturicchio's Madonna Discovered by Two English Tourists.

Special Correspondence to The Sun.
LONDON, Oct. 24.—The theft of Pinturicchio's famous painting of the "Madonna and Child," which was reported in cable dispatches to The Sun, was discovered in circumstances such as might elicit even the most ardent readers of detective stories.

PRIEST AN ACCOMPLICE.

Masterpiece Was Sent to London, Where It Is Now Held at Italian Embassy.

Special Correspondence to The Sun.
LONDON, Oct. 24.—The theft of Pinturicchio's famous painting of the "Madonna and Child," which was reported in cable dispatches to The Sun, was discovered in circumstances such as might elicit even the most ardent readers of detective stories.

Dirigible Balloons Useless, Sir Hiram Maxim Asserts

Says Electrical Disturbance Caused by Fast Moving Airship Will Always Ignite Hydrogen Gas and Cause Explosion

Special Correspondence to The Sun.

LONDON, Oct. 24.—Sir Hiram Maxim, who has been suggested that we should seek a non-inflammable gas to take the place of hydrogen, but unfortunately there is no such gas and not the remotest chance that one can be produced.

So far as we have been able to create inflammable elementary bodies.

It is quite possible that some electricians who have not had experience in a country where the air is very cold and dry, may not agree with me regarding the electrical danger, but aside from this danger, big balloons 500 feet long and 40 feet in diameter are excellent targets.

A balloon in order to lift any considerable weight must be of great bulk, and if this great bulk is to be driven through the air at anything approaching a rapid

rate the envelope holding the gas must be enormously elongated. The latest Zeppelin was 500 feet long, and with this great length and bulk it not only requires a very large building to house such airships, but it is impossible to house them at all if there is anything like a wind blowing at the time.

The great trouble, however, in their management is not in any means the worst difficulty to be encountered, as I intend to point out. When any object is driven through dry air at a high velocity it becomes charged with static electricity and gives off blue flames and sparks.

About thirty-five years ago a large and powerful tugboat belonging to Jersey City was equipped with a new and extra strong boiler of the locomotive type. When it was in position and all the pipes connected it was put under steam. Suddenly a great fire broke out, and the boiler was blown through the roof of the ship.

The fire was not due to any fault in the boiler, but to the fact that the boiler was charged with static electricity and gave off blue flames and sparks.

As far as balloons are concerned the danger is now a very real one. The latest Zeppelin was 500 feet long, and with this great length and bulk it not only requires a very large building to house such airships, but it is impossible to house them at all if there is anything like a wind blowing at the time.

Says English Cook IS WORST IN WORLD

American Writer Points Out Mistakes Made in England in Preparing Meals.

HOW TO MAKE FOOD TASTY

Mary Mortimer Maxwell Admits, However, That London Breakfast Is Good.

Special Correspondence to The Sun.

LONDON, Oct. 24.—The English cook is the worst in the world, says an American writer, Mary Mortimer Maxwell, who has just published a book on "How to Make Food Tasty."

She says that the English cook is the worst in the world, and that the English breakfast is the worst in the world.

She says that the English cook is the worst in the world, and that the English breakfast is the worst in the world.
